

PACKAWORLD™

GOALBALL INSTRUCTIONS

Before set up these instructions **MUST** be fully read and understood. Failure to do so may result in damage and/or injury and void your equipment warranty.

SET UP

1

Step 1: Find a level surface, remove goal from the bag and lay out as shown.

2

Step 2: Ensure the net is NOT tangled, the hoses are NOT twisted and the hard plastic crossbar support struts are in position.

3

Step 3: Remove the dust cap and turn valve fully anti-clockwise – this closes the valve and retains the air in the hose after inflation.

4

Step 4: Connect the hose of the air pump to the bottom connector, insert pump hose into valve and pump to inflate goal.

5

Step 5: Once inflated replace the dust cap(s) and lift goal into upright position. It is easier for TWO people to do this.

6

Step 6: Check that the crossbar is horizontal and plastic net retainers sit flat on hose.

7

Step 7: If the crossbar needs lowering or raising adjust the length of the straps at the rear of the goal

8

Step 8: Finally secure goal by placing two filled water bags on each hard plastic ground support and one on each side of the goal as shown.

9

Step 9: You are now ready to play – enjoy.

PACKAWORLD

GOALBALL INSTRUCTIONS

PACK AWAY

1

Step 1: Remove supporting weights and carefully lay the front of the goal to the ground. **Note:** Ensure goal does not fall as this can cause damage.

2

Step 2: Remove dust cap and turn the valve insert fully clockwise to release air. This may require a little push and wiggle to the valve insert.

3

Step 3: Once goal is deflated remove ALL residual air from hose. To do this move pump hose to top connector and connect other end to the valve. Air extraction will begin when pumped.

4

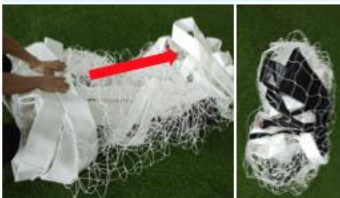

Step 4: Once ALL air is extracted fold the goal. Start from the vertical supports and move these toward the centre.

5

Step 5: Continue to fold from the outside of the goal toward the middle – this may take some practice to perfect.

6

Step 6: Once folded from the sides roll goal from the top to the bottom ready to pack into bag. Remember to replace dust caps of valves once finished.

7

Step 7: Return the goal to the bag and secure with zip and straps ready for transport.

NOTE THESE GOALS ARE HEAVY AND REQUIRE TWO PEOPLE TO CARRY

⚠ CAUTION WHEN USING PACKAWORLD PRODUCTS ⚠

1. Never drag inflated/deflated goal on hard ground as this WILL damage hose.
2. ONLY use the hand pump provided to inflate goal as high pressure mechanical appliances can damage hoses and/or valves and cause injury.
3. Do not store your goal wet or dirty in carry bags, even for short periods of time, as this can discolour and/or stain hoses.
4. Do not expose goal to cold temperatures, even when stored, as this can make plastic components brittle resulting in irreparable damage.
5. Always use a carry bag(s) for transportation and storage of Packaworld products.
6. These goals are heavy and Packaworld recommends two people to lift and carry

PLEASE NOTE THAT PACKAWORLD PRODUCTS ARE TEMPORARY STRUCTURES AND ARE NOT SUITABLE FOR LONG TERM EXPOSURE OUTDOORS. OVER A PERIOD OF TIME THE INFLATABLE UPRIGHTS WILL LOSE AIR AND AS SUCH WILL REQUIRE TOPPING UP WITH AIR WITH THE PUMP SUPPLIED.
